

City of Chicago Climate Infrastructure Fund

Program Description

As part of the Department of Planning and Development's ongoing efforts under the Chicago Recovery Plan, the Climate Infrastructure Fund (the Fund) provides grants from \$50,000 to \$250,000 to nonprofit organizations and small businesses for climate-related capital projects in three priority areas:

Renewable Energy and Energy Efficiency

Energy efficiency upgrades and/or on-site renewable energy

Electric Vehicles and EV Charging

Purchase of electric vehicles and/or installation of electric vehicle charging stations

Green Infrastructure

Mitigation of flooding by rain gardens, permeable paving, native plantings, etc.

How to Apply

- Who:** Eligible applicants must be 501(c)(3) nonprofit organizations or small businesses located in Chicago. The Fund prioritizes projects located in environmental justice communities that are disproportionately impacted by climate change.
- What:** All proposed projects are reviewed using a set of criteria that emphasizes impact, equity, and project readiness.
- When:** The application period is open from December 19, 2022 through February 24, 2023.
- Where:** Please use the [DPD Universal Application](#) to submit an application online.

The \$5 million Climate Infrastructure Fund is part of a larger suite of community climate investments and environmental justice initiatives in the Chicago Recovery Plan. Applications will be made available by the City of Chicago through a series of competitive funding rounds until the Fund is exhausted. Projects falling outside the target funding range may also be considered on a case-by-case basis.

Connecting to the 2022 Climate Action Plan

The Climate Infrastructure Fund is intended to catalyze the vision of Chicago's [2022 Climate Action Plan](#) to accelerate Chicago's equitable transition to a robust green economy for all.

The City of Chicago is committed to reducing greenhouse gas emissions that are causing and expediting climate change, bolstering community resiliency to withstand the impacts that Chicagoans are already experiencing, and doing so with intentionality to assure the benefits of such actions are spread across all neighborhoods.
